RENATA PLC

Online Assessment | AI Solutions Specialist – HR	
Position	AI Solutions Specialist - HR
Assessment type	Take-home task (two parts)
Submission deadline	**27 October 2026, 11:59 PM**
How to submit	Reply to the same email this assessment was sent in
Attachment	Sample Leave Policy (XYZ Company)

1. Introduction

Thank you for progressing to this stage of our selection process for the AI Solutions Specialist -HR position at Renata PLC.

This assessment is designed to show how you work in practice: how you build with AI tools, how you handle sensitive information, and how you think about applying AI to real business processes. It has **one task with two parts**, and both parts are required.

There is no single correct approach. We are interested in your judgement, your ability to deliver something that works, and how clearly you explain your decisions.

2. General Instructions

- Submissions received after the deadline may not be considered. All materials must reach us by **27 October 2026, 11:59 PM BST**.
- You may use **any tool you prefer**, such as Claude, ChatGPT, n8n, Python, or others. You are free to choose your own stack, and we want to see how you choose and use it.
- The attached policy is a **dummy document created for this assessment**. It does not represent any real company policy. Do not share it outside this assessment.
- Please do not upload any real personal or company data into any tool at any point.
- Complete the work independently. Using AI tools to help you build is encouraged, but the thinking and decisions must be your own.
- Be prepared to explain and defend your work in a follow-up interview.

---

3. Part A – Build (Required)

3.1 Objective

Using any AI tool you like, build a simple assistant that answers employee questions **using only the attached Sample Leave Policy**.

3.2 Functional Requirements

Your assistant must meet the following three requirements.

Requirement 1: Answer correctly and cite the policy

- Answer employee questions accurately based on the policy content.
- Point to the relevant section of the policy (for example, section number or heading) in every answer.
- Do not add rules, numbers, or exceptions that are not in the policy.

Requirement 2: Admit when the policy does not cover the question

- If the answer is not in the policy, the assistant must respond with: **"I don't know, please contact HR."**
- It must not guess, infer, or fall back on general knowledge about leave laws or common company practice.

Requirement 3: Protect other employees' personal data

- If a user asks for another employee's personal information (for example, "How many leave days has Rahim taken?" or "Why is my colleague on medical leave?"), the assistant must **politely refuse**.
- The refusal should be courteous and, where appropriate, direct the user to the proper channel (such as HR).

3.3 Technical Guidance

- A simple working solution is better than a complex unfinished one.
- The tool must be usable by us without special setup. If it needs configuration, include clear instructions.
- If your solution requires an API key or account, **do not include your own key in the submission**. Explain how we can run it with ours, or provide a working link we can use.
- If you use code, include a short README covering how to run it.

---

4. Part B – Think (Required)

4.1 Objective

In **one page or less**, write a short note on how AI could improve an HR process.

4.2 What to Cover

Pick **one HR process** that you think is slow or inefficient. Examples include screening CVs, onboarding paperwork, or exit clearance. You may choose a different process if you prefer.

Your note should address:

1. **The process and the problem:** What is the process, and where does it slow down today?

2. **Your AI-based improvement:** How would you improve it with AI? What would change for employees, candidates, or HR staff?
3. **Tools:** Which tools would you use, and why?
4. **Risks:** What could go wrong (for example, accuracy, bias, privacy, over-reliance on automation), and how would you reduce those risks?
5. **Measuring success:** Which metrics would you track to know whether the improvement is working?

4.3 Format

- Maximum **one page** (A4). Content beyond one page will not be reviewed.
- Submit as a PDF or Word document.
- Clear, concise writing is valued over length.

---

5. Video Walkthrough

Along with your work, record a **walkthrough video of 3 minutes or less**.

In your video, please:

- Show your assistant working, including at least one in-policy question, one question the policy does not cover, and one request for another employee's personal data.
- Briefly explain how you built it and the key decisions you made.
- Mention one limitation of your solution and what you would improve with more time.

Videos longer than 3 minutes may not be reviewed in full. You may share the video as an attachment or as a link. If you use a link, make sure it is accessible to us without requesting permission.

---

6. Submission Requirements

Reply to the **same email** in which you received this assessment, no later than **27 October 2026, 11:59 PM (BST)**, with the following:

#	Deliverable	Notes
1	**Link to the working tool, or its code**	Make sure the link is accessible. For code, include a README with run instructions.
2	**Video walkthrough (3 minutes or less)**	Attachment or accessible link.
3	**Part B note (one page or less)**	PDF or Word format.

We look forward to reviewing your work. Good luck!
